

# Tokenomics Boost

This financial projection presentation will serve two purposes:

- 1** Overview of our current financial status vs. what it might be in the coming years.
- 2** An accessible explanation of our ecosystem  
Key metrics in our fundraiser and investor slide decks

Airdrop&Treasury	10,000,000	Vesting,Long-Term Staking	Rewards

# Implementation of tokens

# HOLDER FINANCES

Exclusive Features and "access-first" Functionality to Token Holders

A part of BOOST's features will be limited only to those holding BOOST tokens. For example, token holders may be able using staking, sms service, advert and many more

Liquidity Providers earn on the paid subscriptions  
Contributing the tokens to the DEX liquidity pools will ensure that BOOST tokens can be traded when needed.

Therefore, we want to reward users who help solve the liquidity problem on the decentralized liquidity provider platform. With respect to this, we will send half of the fee to the person who pledged the CRYPTO/BOOST pair on swap. Of course, this will be distributed in proportion to the amount pooled by the user.

Referral and Reward Systems use only BOOST Tokens  
As an important feature of our growth strategy, recommendations will become another important use case for BOOST tokens.

Layer 1 Users, Wallets, influencers, social media accounts, blogs, or news media will all receive their referral rewards in the form of our tokens.  
In addition, airdrops that provide liquidity to the wallet will only be sent in Boost tokens.

**THANK YOU!**
